**Emanuel Junior**  
Software Developer

Windhoek Hochland  
Park

---

Dear Hiring Manager,

I am excited to apply for the Software Developer position at [I]. As a highly motivated and experienced software developer with two years of experience, I am confident that I have the skills and expertise necessary to excel in this role.

In my previous role as a Freelancer, I developed a strong background in programming, software architecture, and database design.

My experience working with various programming languages such as Java, Python, and Php, has allowed me to develop high-quality software applications that meet clients' needs.

Furthermore, my expertise in software architecture has allowed me to design and develop scalable and maintainable software systems. I have also worked on projects that involved database design, optimization, and management. I have experience with SQL. I am confident in my ability to design and implement databases that meet the specific needs of each project.

I am a highly motivated and detail-oriented individual who thrives in a team environment. I understand the importance of clear communication and collaboration in software development projects. I have excellent problem-solving skills, and I am always looking for ways to improve my skills and stay up-to-date with the latest technologies and best practices.

Thank you for considering my application. I am excited about the opportunity to contribute to your team and help your company achieve its goals.

Sincerely,  
**Emanuel Junior**

## SOFTWARE DEVELOPER

## PROFESSIONAL PROFILE

---

I am a dedicated, organized and methodical individual. I have good interpersonal skills, am an excellent team worker and am keen and very willing to learn and develop new skills. I am reliable and dependable and often seek new responsibilities within a wide range of employment areas. I have an active and dynamic approach to work and getting things done. I am determined and decisive. I identify and develop opportunities.

## WORK EXPERIENCE

---

### FREELANCER

April 2021 - NOW

my experience as a software developer who has work as a freelancer. As someone who has been in this field for 2 years, I have seen both the benefits and challenges of working independently. First and foremost, freelancing allows me to have more control over my work schedule and projects. I can choose which projects to take on and when to work on them. This flexibility is especially important to me as a software developer, since I often need to work odd hours or respond quickly to client needs. However, freelancing also requires a great deal of self-discipline and organization. Unlike a traditional office job, I am responsible for managing my own time and ensuring that projects are completed on time and to the client's satisfaction. This can be a challenge, but I have found that setting clear goals and deadlines for myself has helped me stay on track.

**RE: Letter to Employer on behalf of Mr Emanuel Constancio Casimiro Junior (student no: 220118809)**

Dear Sir/ Madam

The Faculty of Computing and Informatics at the Namibia University of Science and Technology (NUST) is offering a Degree - Computer Science specializing in Software Development. The Degree was designed in close cooperation with the local industry. One of the key components of these courses is practical in-service training (*hereafter called "Work Integrated Learning"*).

Please allow me to elaborate a little on our **Work Integrated Learning** program:

The work-integrated learning component is scheduled for the final semester where the student will spend 12 weeks in the industry. One of the requirements is that students passed all 2<sup>nd</sup> years' subjects. Therefore, we assume that all students qualifying for work-integrated learning have a sound theoretical foundation. The primary purpose of the student's work-integrated learning semester is to provide the student with the opportunity to obtain hands-on practical experience in his/her relevant field of study. For this reason, it is imperative that the employer subject the student to meaningful and stimulating activities that are related to the student's field of study; e.g. minor software design and implementation projects, elementary research, administrative work, participation in related projects, etc. It is important that work accomplished by the student prove meaningful and beneficial to the employer. This aspect of the student's practical training will play a major role in his/her final assessment by NUST.

During the work-integrated learning, the department will continue to support and supervise the student. For each student, there will be one staff member appointed for supervision. This staff member together with the supervisor of the hosting institution will evaluate the work of the student.

This letter also serves to bring to your attention the continuous need for positions in Industry where the above-mentioned students can be placed for the purpose of performing their **work integrated learning**. Whilst we academic staff and students at NUST firmly believe that the studies offered are meaningful and relevant to the requirements of the country, we would like to think that we can count on your valued support, not only in providing bursaries but also in giving employment opportunities for students doing their **work integrated learning**. This will make a valuable contribution towards the development of the graduate who eventually approaches you for employment.

May I request that you mandate the decision makers in your organization who are involved with the recruitment and employment of technical personnel to proceed with the necessary steps to support students in this regard.

Thank you for your co-operation.

Yours sincerely

Mr. Gereon Koch Kapuire

Co-coordinator: Work Integrated Learning (Software Development)
